DETAILED ACTION

Claim Objections

1. Claim 26 is objected to because of the following informalities: In claim 26, line 8, "the electron" lack antecedent basis. Appropriate correction is required.

Double Patenting

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

3. Claims 23 and 26 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 21 and 22 of prior U.S. Patent No. 6,617,798. This is a double patenting rejection.

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 2821

5. Claims 24 and 25 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 21 and 22 of U.S. Patent No. 6,617,798. Although the conflicting claims are not identical, they are not patentably distinct from each other because both the instant application and the issued patent claim a method for driving a flat panel display, wherein the flat panel display including a back plate, a gate electrode, a cathode electrode, a planar field emission source formed on the cathode electrode, a mesh plate having a plurality of apertures corresponding to a pixel area, and a faceplate spaced from the grid plate and having a screen formed on one surface thereof facing the mesh plate. The only obvious difference between the instant application and the issued patent is that the instant application claims "gate electrode" or the "grid electrode" being formed of a "single layer" which is an inherent and/or obvious variation to the "gate electrode" or the "grid electrode" claimed in the issued patent '798.
